### LANGUAGES

- Arabic
- English

### EDUCATION

**Bachelor of Technology in Computer Science**  
*Arab Academy for Science, Technology, and Maritime Transport*

September 2020 – September 2024  
Alexandria, Egypt  
*(ABET Accredited)*

**Master in Data Analytics & Artificial Intelligence**  
*Steinbeis University*

May 2025 – Present | Berlin, Germany  
*(German Accreditation Council through FIBAA)*

### COURSES

**Introduction to Mobile Development** 

*Meta*

February 2025

- Completed training in mobile application development fundamentals and architecture
- Gained knowledge of UI/UX design, responsive layouts, and cross-platform development
- Studied mobile frameworks, API integration, and performance optimization
- Developed understanding of mobile application lifecycle, deployment, and maintenance best practices

**Oracle Cloud Infrastructure Foundations** 

*Oracle*

December 2024

- Completed training in Oracle Cloud Infrastructure (OCI) architecture and core services
- Gained knowledge of OCI security, networking, and storage
- Studied cloud deployment and resource management best practices
- Prepared for Oracle Cloud certification

### PROFILE

I'm a Salesforce Developer and Data Analyst working on enterprise systems at Emaar, where I focus on building reliable, high-performing solutions and turning data into insights that teams can actually use. My work sits at the intersection of development, data, and quality. I've been involved in optimizing Salesforce applications, testing integrations with external systems, and making sure data flows smoothly between Salesforce and Oracle EBS/Fusion. I enjoy working with data end-to-end—cleaning it, shaping it, and building dashboards in Power BI that support better decision-making. Lately, I've been focusing more on AI-driven solutions. I'm working on automating BRD-to-development workflows (like generating Apex classes and supporting integration migration) and exploring AI-generated insights and dashboards to make reporting faster and more intelligent. I'm continuously building my skills in AI, advanced Salesforce development, and data analytics, with the goal of creating systems that are not just functional, but genuinely useful and scalable.

### PROFESSIONAL EXPERIENCE

**AI Engineer**  
*EMAAR*

July 2026 – Present | Dubai,U.A.E

- Built an AI-powered internal alerting and analytics dashboard, integrating LLMs with enterprise databases to provide real-time monitoring, automated analysis, and instant natural-language summaries.
- Developed AI-driven internal automation tools that streamlined business processes, reducing manual effort, processing time, and operational costs by approximately 50%.
- Integrated multiple enterprise applications, APIs, and databases into AI solutions, enabling users to interact with business systems through a natural-language conversational interface and retrieve required information faster.
- Designed LLM-powered data retrieval and analysis workflows that transformed complex enterprise data into concise, context-aware answers and insights for business users.
- Collaborated with business and technical teams to identify AI automation opportunities, translating business requirements into practical, scalable AI engineering solutions.

**Salesforce Developer & Analyst**  
*EMAAR*

April 2025 – Present | Dubai,U.A.E

- Worked on improving and optimizing Apex classes in the Emaar One App, helping reduce execution time by ~25% and making the system more stable for users.
- Tested and validated integrations between Salesforce and external systems, improving API reliability and reducing integration-related issues by ~30%.
- Supported and monitored data flow between Salesforce and Oracle EBS/Fusion, maintaining ~99% data accuracy across systems.
- Cleaned, structured, and prepared data for reporting, improving dashboard data quality and usability by ~30%.
- Contributed to AI-driven initiatives, including automating BRD-to-development workflows (such as generating Apex classes and supporting integration migration), reducing manual effort by ~35%.
- Explored AI-generated insights and dashboards, helping speed up reporting processes by ~25% and making insights more accessible to business teams.
- Built and maintained automated test scenarios using Cypress, reducing manual testing effort by ~40% and catching issues earlier in the cycle.
- Supported deployments and testing cycles, helping reduce release-related issues by ~20% and ensuring smoother production rollouts.

SKILLS

---

Problem-Solving & Analysis

- Data structures
- Algorithms
- Advanced databases

CRM

- Salesforce
- Oracle Fusion

Data Processing Tools

- Power BI
- Excel
- SQL/SOQL
- Tableau
- Snowflake
- Informatica

Programing Languages

- Python
- Java
- Web(HTML,CSS,JS,PHP)
- Cypress
- Kotlin
- C++
- Apex

Quality Assurance

- Software testing using Cypress
- Test automation

AI Tools & Platforms

- Cursor AI
- Claude (Anthropic)
- ChatGPT (OpenAI)
- GitHub Copilot
- OpenAI API
- Anthropic Claude API
- Google Gemini

AI & Machine Learning

- Generative AI
- Large Language Models (LLMs)
- Prompt Engineering
- AI Agent Development
- Retrieval-Augmented Generation (RAG)
- AI Workflow Automation
- Model Evaluation & Testing

Soft Skills

- Attention to Detail
- Analytical Thinking
- Communication Skills
- Problem-Solving
- Adaptability

Defect Tracking

- Jira
- Trello

Data Analyst and QA

EMAAR

September 2024 – April 2025 | DUBAI, U.A.E

- Developed 10+ interactive Power BI dashboards, enabling real-time tracking of key business metrics and improving reporting efficiency by 30%.
- Redesigned 8+ dashboards, enhancing user experience and reducing stakeholder data interpretation time by 25%.
- Collaborated with cross-functional teams (5+ departments) to streamline data workflows, contributing to 20% faster decision-making cycles.
- Executed end-to-end testing for 15+ application features, ensuring high-quality delivery and reducing post-release defects by 35%.
- Performed exploratory testing on mobile applications, identifying 25+ UI/UX issues and performance bottlenecks, improving overall app stability and user satisfaction.

Software Application Developer

Mega Trust

October 2023 – June 2024 | Alexandria, Egypt

- Developed Travel Genie, an AI-powered mobile app offering virtual multilingual guides and interactive historical content for tourists.
- Utilized Node.js, MongoDB, and FlutterFlow for app development and deployment, ensuring cross-platform functionality.
- Executed manual and automated testing to maintain functionality, usability, and performance standards.
- Managed an Agile team, overseeing sprints, feature planning, and code quality reviews.

Web Performance Tester

Appsoft

August 2023 – September 2023 | Alexandria, Egypt

- Documented results of tests conducted and maintained organized database of all findings.
- Performed manual testing of web applications, ensuring high-quality product release.
- Reported bugs and errors to development team, following up on issues until resolved.
- Collaborated with engineers to develop effective strategies and test plans.
- Provided feedback to development team regarding system usability improvements.

CERTIFICATES

---

Google Data Analytics 

- Google Data Analytics Professional Certificate

Salesforce Sales Operations 

- Salesforce Sales Operations Professional Certificate
